

Enjoy Immersive Home Cinema Sound with Sonos Arc

The premium smart soundbar for TV, music and more. Enabled by Sonos' powerful new software platform, Arc introduces Sonos's most immersive home cinema experience yet.

- Immerse yourself in entertainment and music with rich, realistic 3D sound with support for Dolby Atmos surround.
- Arc's acoustic design moves sound around you with an ultra-wide soundstage and impressive bass, delivering dramatic clarity, detail, and depth.
- Experience adaptive, software-driven sound tuned perfectly to your space and setup with Trueplay. Arc automatically changes its tuning based on the other speakers you have in your home cinema setup and whether you're listening to music or TV.
- Arc's elongated shape and seamless 270-degree curved grille enable multi-directional sound whilst fitting elegantly into your room.
- Set Arc in front of a standing TV or mount to the wall with a custom-designed wall mount available for £69. A simple connection through HDMI eARC or ARC keeps setup simple whilst enabling high-quality audio playback.
- Enjoy seamless control with the all-new Sonos app, your existing TV remote, your voice with Amazon Alexa or the Google Assistant, Apple AirPlay 2, and more.
- Use Arc on its own for a powerful 5.0 or Dolby Atmos listening experience, or expand your setup with the new Sonos Sub and a pair of One SL surrounds for even more immersive entertainment.

Audio

Eleven Class-D digital amplifiers

Perfectly tuned to Arc's acoustic architecture.

Eight elliptical woofers

Ensure faithful playback of mid-range and vocal frequencies in addition to rich bass.

Three precisely-angled silk-dome tweeters

Create crisp high frequencies and crystal-clear dialogue.

Four far-field microphone array

Uses advanced beamforming and multi-channel echo cancellation so your voice assistant can readily respond when activated.

Trueplay software

Dynamically tunes Arc to the unique acoustics of the room. iOS device required.

Adjustable EQ

Settings in the app, including bass, treble, and loudness.

Speech Enhancement

Emphasises frequencies of the human voice to clarify dialogue.

Night Sound

Reduces the intensity of loud sound effects.

Details

Dimensions - H x W x D

3.4 x 45 x 4.5 inches (87 x 1141.7 x 115.7 mm)
