

# Studio-Quality Sound with Sonos Five

Sonos's most powerful speaker for music and more in high-fidelity sound. Enjoy seamless control with the all-new Sonos app, Apple AirPlay 2, music service apps, and more.

- Experience bold sound that can fill any space. Sonos Five delivers the same great sound as the Play:5, with updated internals including increased memory, processing power, and a new wireless radio.
- Three custom-designed woofers deliver rich bass whilst the sealed architecture eliminates reverb and echo.
- An enduring design that continues to fit perfectly into any space, Five is available in black with a black grille and, for the first time, white with a white grille.
- Enjoy great sound with a standalone Sonos Five horizontally, or pair two Fives in the upright position for incredibly detailed stereo separation.
- Trueplay puts the speaker-tuning capability of recording pros in the palm of your hands and optimises the sound for the room.
- Control Sonos Five with only your voice when connected to a voice-enabled device, such as an Amazon Echo or Google Home.
- Use line-in to connect your vinyl player to your Sonos system.

## Audio

### Six Class-D digital amplifiers

Perfectly tuned to Five's acoustic architecture.

### Three tweeters

One centre tweeter and two precisely-angled side tweeters create a crisp high-frequency response.

### Three midwoofers

Ensure faithful playback of vocal frequencies in addition to rich bass without distortion, even at high volumes.

### Phased array

Creates a wide stereo soundstage that directs sound to the left, right, and centre.

### Analogue line-in

With 3.5 mm jack for connecting another device.

### Trueplay software

Dynamically tunes the speaker to the unique acoustics of the room. iOS device required.

### Adjustable EQ

Settings in the app, including bass, treble, and loudness.

## Details

### Dimensions - H x W x D

8.03 x 14.33 x 6.06 inches (203 x 364 x 154 mm)
