

Personal Listening Perfected with Sonos Ace

After years of fan requests, masterful fine-tuning and meticulously detailed design, Sonos Ace is here. Obsessively crafted to look and feel as good as it sounds, the innovatively designed Sonos Ace cradles you in comfort while delivering the highest fidelity audio with a groundbreaking home theatre experience that could only come from Sonos.

- **Indulge in high-fidelity sound:** Savor every second of your favorite song, podcast or friend's phone call thanks to Sonos Ace's two custom-designed drivers that render each frequency with impeccable precision and clarity.
- **Endless comfort:** Sonos Ace uses lightweight, premium materials for an airy fit that gently hugs your head. Its pillowy soft memory foam interior is wrapped in vegan leather, while a custom headband and cups that hide the hinge create the perfect acoustic seal without catching on hair.
- **Timeless design:** With an elegant, slim form, Sonos Ace beautifully blends metal accents with a sleek matte finish in both Black and Soft White – understated-yet-confident neutrals that complement any style, no matter how fast trends move.
- **Your own private cinema:** Instantly swap the TV audio from Sonos Arc to Sonos Ace with just the tap of a button, and enjoy a surround sound home theater experience just for you. Spatial audio with Dolby Atmos envelops you in dramatically detailed sound from all directions and dynamic head tracking keeps you centered in the action, even when you reach for the snack bowl. Coming later this year, Sonos' all-new TrueCinema technology precisely maps your space then renders a complete surround sound system for a listening experience so realistic you'll forget you're wearing headphones.
- **Turn the world on or off:** Make personal listening even more personal with world-class Active Noise Cancellation (ANC), which uses precisely placed microphones to detect and block out intrusive noises. When you want more awareness of your surroundings - be it walking on a busy street or working in the office - simply activate Aware mode to let those ambient noises in.
- **Intuitive use:** Wearing and storing Sonos Ace is a breeze - contrasting colors inside the ear cups subtly signal which way to put the headphones on and beautifully-tactile buttons make controls easy to use while wearing them. When you're done listening, put Sonos Ace away effortlessly thanks to its fold flat design that fits snugly in its lightweight travel case.
- **Day-long battery life and ultra-fast charge:** Listen or talk for up to 30 hours with an extended, energy-efficient battery life. Ultra fast charging ensures you'll never miss a beat - get 3 hours of battery life with a quick 3-minute charge using the included USB-C cable.
- **Responsibly made:** Sonos Ace is built to last and made for daily wear, with replaceable ear cushions, circular materials that allow us to use 17% less virgin plastic, and a 75% recycled felt travel case made from plastic bottles. Engineered to drive energy efficiency, wear detection pauses your music when you remove Sonos Ace from your ears, minimizing the need for charging.

Audio

Drivers

Custom-designed 40 mm dynamic driver in each cup.

Microphones

Eight beamforming microphones for noise control and voice targeting so every word is crisp and clear.

Spatial Audio

Surround yourself in hyper realistic three-dimensional sound, including an industry-leading Dolby Atmos experience and dynamic headtracking, from supported services and devices.

Lossless Audio

Enjoy lossless audio over Bluetooth® with a supported device with Qualcomm Snapdragon Sound AptX for Lossless or via a USB-C connection.

Noise Control

Block external sounds with Active Noise Cancellation (ANC), or use Aware mode to blend ambient sound with your content.

TV Audio Swap

Press the Content Key to swap sound from a compatible Sonos soundbar to Sonos Ace. Sonos' TrueCinema technology optimizes sound for your space for a hyperrealistic listening experience.

Wear Detection

Built-in sensors detect when you're wearing Sonos Ace, so playback pauses when you take it off and resumes when you put it back on.

Adjustable EQ

Customize your spatial audio experience and adjust bass, treble, and loudness via the Sonos app.

Details

Dimensions (H x W x D)

7.52 x 6.3 x 3.35 inches (191 x 160 x 85 mm)

Weight

11 oz (312 g)

Colors

Black, Soft White

Fit & Finish

Foam-cushioned headband for all-day comfort; stainless steel, matte finish for everyday wear.

LED

Light on the bottom of the left cup indicates connection status.

Controls

Use the right cup buttons to control volume, play/pause/skip tracks, answer/decline calls, or switch between ANC and Aware mode. Use the left cup buttons to power on or pair a device.

Power and Connectivity

Bluetooth 5.4

Supports audio streaming from any Bluetooth-enabled device.

Battery

Li-ion, 1060mAh battery powers up to 30 hours of listening time with ANC or Aware mode enabled.

Charging

Charge with included USB-C cable and a compatible power source. Rapid charge provides 3 hours listening time in 3 minutes from 0%. Complete charge from 0% requires approximately 2 hours.
